**Figure 14: administrator user monitoring groups**

In fact, as it can be seen above, the administrator user has a complete view of all groups created by all users!

As a user, it is also possible to contact the group owners or the users of a particular group:

- [Contact Owners](#) : open the default mailbox on the local computer, in order to send an email to a selection of group owners deduced from the search field. The user has then to paste the email addresses from the clipboard
