

Group feature for STF by Orange SA – Version 1.0

- remove a filtered selection of users
- update the default groups quotas allocated to each user at its creation time
- update the groups quotas allocated to an individual user after its creation
- send an email to a selection of users

Note that the possibility to create a user before his first login is very useful because it allows defining in advance his rights in term of quotas and group membership!

The Figure 21 below shows the general view while managing users.

The screenshot shows the STF user management interface. At the top, there is a navigation bar with icons for Control, Devices, Groups, and Settings, along with links for Contact Support, Logout, and Help. Below the navigation bar, there is a sub-navigation bar with tabs for General, Keys, Groups, Devices, and Users, with the Users tab being active. The main area is titled "User list". It contains a search bar, a page navigation bar showing page 1 of 4, and a toolbar with links for Contact Users, Default Groups Quotas, Filters, Confirm Remove, and Remove. A table lists four users: administrator, bob, lca, and tom, each with their email and privilege level. To the right of each user entry are "Groups Quotas" and "Remove" buttons.

Figure 21: managing users

- : create a new user

The screenshot shows the STF user creation form. At the top, there is a sub-navigation bar with tabs for General, Keys, Groups, Devices, and Users, with the Users tab being active. The main area is titled "User list" and contains a "Create new user" section. It has fields for "Name" and "Email", both of which are highlighted with red boxes, and a "Create" button.

Note: the **Name** field must conform to this regular expression : `/^ [0-9a-zA-Z-_\.] {1,50} $/`

- **Filters** : set a filter for removing user(s) action applying on the selection of users
